“DEEPSHIELD HAS FAST BECOME THE INDUSTRY STANDARD WITH ITS DEEP IMPREGNATING SEALER TECHNOLOGY.”

GOLD TRANSPARENT PENETRATING SEALER
DEFEND YOUR TILES AND PROTECT YOUR STONE FROM EROSION, STAINS, WATER & OIL BASED DAMAGE.

Deepshield® GOLD ultra premium penetrating / impregnating water based sealer is designed to provide deep and lasting invisible stain protection for all interior & exterior surfaces, including natural stone tiles, porcelain, ceramic & grout lines.

Deepshield® Gold fast curing sealer protects against water and oil based containments for up to 15 years.

HOW IT WORKS
Deepshield® GOLD ultra premium fast curing sealer, is ideal both indoors and outdoors, on natural stone, tile and grout surfaces, with zero unpleasant odours or flammability problems.

Deepshield® GOLD works using advanced fluorine chemistry technology to react with the surface pores, leaving an invisible, breathable, protective barrier against staining as well as water and oil based containments.
HOW IT WORKS

This sealer works by chemically reacting with the surface pores using advanced fluorine chemistry technology developed to create a protective barrier to water and oils. The active component is a molecule consisting of silicon, carbon, hydrogen, oxygen atoms. The molecule has two ends, one hydrophilic the other hydrophobic.

When applied, the hydrophilic end reacts with moisture retained in the substrate and breaks away to form another compound that reacts within the masonry lattice. This reaction forms a bond that is stronger than any mechanical or hydrogen bonding of conventional film forming sealers, the exposed hydrophobic end of the molecule changes the surface energy with the result that water and oils are now repelled, but the micro pores are still open enough to allow moisture vapour to escape making the treated surface breathable.

PRODUCT FEATURES

- Deepsield GOLD will last up to 15 years or longer dependent on surface usage and weather.
- Optimal protection for porous surfaces and non-porous surfaces such as marble.
- Protects natural stone, concrete, Terracotta, unglazed tiles, pavers against water damage & staining.
- Provides superior stain resistance against contaminants such as oil, grease, graffiti, coffee & wine.
- Stone retains a natural look, does not alter the stones appearance.
- Enables easier removal of dirt, food, beverage, oil and grease stains.
- Water based, Non-Flammable, Odourless, No toxic fumes.
- Does not alter the coefficients of friction or slip factor.
- Assists in eliminating the occurrence of efflorescence.
- Deep penetrating & impregnating.
- Can be applied while surface is still damp.
- Anti Bacterial Protection!
- Enhanced water, oil and stain protection technology.
- Uses advanced fluoro-bond technology.
- Efflorescence, salt attack and stain protection!
- Reduces moss, mould and algae growth.
- Reduces corrosion attack on steel reinforcing.
- Will not etch, alter or discolour the natural look.
- Highly breathable, allowing water vapour to escape.
- Alkali resistant, food safe.
- Quick dry formula.
- Highly Breathable.
- Provides a salt barrier, ideal around saltwater pools or marinas.
- Non-Film forming means it will never peel or flake.

AVAILABLE SIZES

1 LITRE, 5 LITRE, 10 LITRE, 20 LITRE
